Response to Arguments

- Applicant's arguments, see page 7, lines 1-24 and page 8, lines 1-10, filed 24 June 2005, with respect to claims 1-20 have been fully considered and are persuasive.
- The rejection of these claims has been withdrawn.

REASONS FOR ALLOWANCE

- The following is an examiner's statement of reasons for allowance: The present invention is directed to an automated document template creation method and system. Both independent claims identify the uniquely distinct feature, "for decomposing an image into at least one object using at least one image processing technique and determining at least one design attribute of the at least one object and synthesizing a document template

that contains the at least one design attribute". The closest prior art, Kopec et al. (USPN 5,594,809), disclose automatic training of character templates using a text line image, a text line transcription and a line image source model; while Cullen et al. (USPN 5,465,304), disclose segmentation of text, picture and lines of a document image, either singularly or in combination, fail to anticipate or render the above underlined limitation obvious.

- Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
